Qoltec Electronic Timer PC0628 | 3680W | 16A | LCD

Product code: 50628

Electronic timer with LCD display designed to control the switching on and off of various devices at a specific time, e.g. managing lighting, heating, home appliances. With this device, you can manage your home according to your individual needs. Practically all electrical devices supplied with 230 V can be connected to the programmer.

SAVE ON YOUR BILLS TODAY

Have you ever wondered **how to effectively reduce your electricity bills**? Saving energy nowadays is not easy, but fortunately technology comes to the rescue. **All you need is a small device - an electronic timer from Qoltec -** to start optimising your home's energy consumption in an easy and effective way.

AUTOMATE YOUR HOME ELECTRICAL APPLIANCES

A timer is a device that **manages the electrical power supply of household appliances** , so we can significantly **reduce our energy costs**. All you have to do is to programme the operation of the device, set the day and time of its operation, adapting it to your needs. We can connect practically all electrical appliances that are powered by 230V. **Main product features** :
- Alternative **12/24-hour system**,
- Easy switching between standard and daylight saving time,
- Up to 10 on/off settings per day,
- Time setting includes HOUR, MINUTE and DAY,
- Manual override function to set the timer to always on or off,
- Random setting to have the lights turn on and off at random times e.g. during holidays.

CONFIDENCE CONFIRMED BY A WARRANTY

Do you care about the high quality of the product you are buying? Our solutions will meet your expectations. The offered product is covered by a **24-month guarantee** valid from the date of purchase.
