SAFETY WARNINGS FOR USE DVB-T2 ANTENNA

The following list of safety warnings has been compiled in accordance with the requirements of the General Product Safety Regulation (EU) 2023/988 (GPSR). Its purpose is to protect users from potential hazards arising from the misuse of products. The warnings have been formulated in a simple and understandable way to be accessible to a wide audience, including the elderly and people with reduced mobility.

The dvb-t2 antennas on offer from manufacturer NTEC sp. z o.o. are CE certified, which proves their compliance with EU safety standards.

Use dvb-t2 antennas in accordance with their intended use and the manufacturer's recommendations.

BASIC HAZARDS AND PRECAUTIONS

1. Risk of electric shock

- Do not install or repair antennas during a storm.
- Ensure that the antenna is connected to a grounded system in accordance with local electrical regulations.
- Connecting the antenna should only be done with the power supply switched off.

2. Risk of falling during installation:

- Mounting antennas at heights can be dangerous.
- Use only sturdy ladders and appropriate protection, such as a mountaineering harness, when installing on a roof or other elevated locations.
- Use a qualified specialist for installation in hard-to-reach areas.

3. Risk of injury:

- Wear protective gloves when assembling, dismantling or maintaining the antenna.
- Regularly check the antenna for mechanical damage.

4. Risk of overheating:

- Excessive heating of the antenna can lead to damage or a fire hazard.
- Avoid installing antennas in areas without adequate ventilation or exposed to intense sunlight for long periods of time.

SPECIFIC HAZARDS ARISING FROM USE

5. Threats associated with strong winds:

- The antenna can be damaged by strong winds, risking detachment and falling.
- Ensure that the antenna is firmly fixed to a stable structure using suitable brackets and fixings.
- Check the condition of the attachment regularly, especially after storms or strong winds.

6. Risk of corrosion in humid environments:

- Antennas made of corrosion-resistant materials, such as plastic, are ideal for outdoor mounting. Before mounting the antenna outdoors, check the resistance marking (e.g. IP65).
- Nevertheless, if you have the opportunity, mount the antenna in a place protected from direct contact with water.

7. Risks associated with electromagnetic interference:

- Antennas can generate electromagnetic interference that can affect other electronic devices.
- Install the antenna at least 1 metre away from other electronic devices.

8. Danger during extreme weather conditions:

- Extreme weather conditions can cause damage to the antenna.

- In the event of impending storms, high winds or hailstorms, ensure that the antenna is adequately protected, or consider removing it temporarily.

MAINTENANCE PRECAUTIONS

9. Cleaning the device:

- Regular neglect of maintenance can lead to failures or safety hazards.
- Check the antenna at least once a year for mechanical damage, corrosion and mounting stability.
- If you notice any damage, discontinue use of the antenna and consult the manufacturer or its authorised service centre

10. Storage

- When the antenna is not in use, store it in a dry, clean place, away from moisture, dust and heat sources.

ADDITIONAL WARNINGS

11. Child safety

- Keep the antenna out of the reach of children to prevent accidental activation or damage.

12. Avoid modifications

- Do not attempt to repair or modify the antennas yourself, as this may affect their security and the quality of the connection.

13. Action in the event of an emergency:

- If the unit exhibits abnormal operation, such as overheating, sparking, unusual odour or noises, immediately switch it off and disconnect it from the power supply and then contact the service centre.
- If you observe any unsafe product behaviour, contact the manufacturer urgently.

THE IMPORTANCE OF COMPLYING WITH THE WARNINGS

Following the above warnings minimises the risk of personal injury, equipment failure and property damage. Ignoring the recommendations can lead to serious health and material risks. Keep yourself and your loved ones safe by observing the precautions indicated.
