

Qoltec 2-in-1 HDD/SSD Docking Station | SATA | M.2 NVMe | Cloning | USB-C 3.2 Gen 2 | 10Gb/s | 28TB | Aluminium

Product code: 52631

The Qoltec docking station enables convenient use of two types of storage media: 3.5" HDDs and 2.5" HDDs/SSDs. It allows for fast file transfers, backups, data recovery and cloning of entire drives without the need to install them inside a computer. The docking station supports storage media with a total capacity of up to 28 TB: a maximum of 20 TB for a SATA drive and 8 TB for an M.2 NVMe drive. The USB 3.2 Gen 2 interface enables data transfer speeds of up to 10 Gb/s.

SAVE TIME WHEN COPYING FILES

Fast data transfer speeds of up to 10 Gb/s, USB-C 3.2 Gen 2

The USB 3.2 Gen 2 interface provides **data transfer speeds of up to 10 Gb/s**, enabling the docking station to quickly copy large files, high-resolution photos, video footage, documents and extensive backups. The high connection bandwidth allows for efficient data transfer between a SATA drive and an M.2 NVMe drive, as well as convenient access to files stored directly on the connected drive.

Supports capacities up to 28 TB – 20 TB SATA & 8 TB NVMe

The docking station supports **storage media with a combined capacity of up to 28 TB**, including **SATA drives with a capacity of up to 20 TB** and **M.2 NVMe drives of up to 8 TB**. The ability to use a high-capacity SATA HDD or SSD alongside a fast M.2 NVMe drive simultaneously makes it easier to organise, transfer and secure large amounts of data.

WE CREATE SOLUTIONS THAT MAKE A DIFFERENCE IN EVERYDAY LIFE

A convenient solution for home, office and service centres

This docking station for HDD, SSD and M.2 NVMe drives is ideal for, amongst other things:

- backing up data,
- recovering data from an old computer,
- copying files between storage devices,
- upgrading to a larger or faster drive,
- archiving photos and recordings,
- servicing computers,
- preparing drives for further use,
- using a drive without installing it in a computer case.

Simply insert the storage device into the appropriate slot, connect the device and start working with your data.

A CONVENIENT AND VERSATILE SOLUTION FOR SSDS AND HDDS

Two-way cloning of SATA and M.2 NVMe drives

The 2-Way Clone function allows you to copy data in both directions: from a SATA drive to an M.2 NVMe drive, and from an M.2 NVMe drive to a SATA drive. This allows you to easily transfer your operating system, programmes, settings and other files to a new drive, create a full backup or replace a drive without having to install any additional software. The cloning process is started by pressing the COPY button, and the 25%, 50%, 75% and 100% LEDs indicate its progress.

UASP and TRIM support – improved performance and more efficient operation of SSDs

The docking station supports the UASP (USB Attached SCSI Protocol) and the TRIM function, which facilitate fast and efficient operation with SSDs and M.2 NVMe drives. UASP technology streamlines communication between the drive and the computer, enabling faster data transfer, shorter file access times and better utilisation of the USB 3.2 Gen 2 interface. The TRIM function helps the operating system to manage unused memory blocks correctly, which helps maintain high drive performance for longer and reduces unnecessary write operations.

JUST PLUG IT IN AND GET STARTED

Plug & Play functionality – easy to use without installing drivers

Our docking station operates in Plug & Play mode. Simply insert an HDD, SSD or M.2 NVMe drive into the appropriate slot, connect the device to your computer and start browsing, copying or backing up your data. Installing an SSD or HDD is easy, quick and requires no specialist technical skills.

Robust aluminium casing – durability and effective heat dissipation

The docking station features a robust aluminium casing, which protects the device's components from accidental damage and ensures stability when inserting and removing drives.

Aluminium also facilitates effective heat dissipation generated during prolonged copying, cloning and transferring of large amounts of data.

CONFIDENCE CONFIRMED BY A WARRANTY

This product comes with a 24-month warranty

Do you want to be sure of the high quality of the product you're buying? Our solutions will meet your expectations. The docking station comes with a **24-month warranty** valid from the date of purchase.

TECHNICAL DATA

Producer	Qoltec
External interface	USB-C 3.2 gen 2
Internal interface	SATA III / M.2 NVMe
Capacity	Supports a total of up to 28 TB (20 TB SATA + 8 TB NVMe)
Transmission speed	10 Gb/s for NVMe 6 Gb/s for SATA
Input voltage	12V
HDD	3.5"
SSD	2.5" or 3.5"
Supported operating systems	Windows XP/7/8/10 MacOS Linux
Compatible with	Laptop, PC
Power cable length	~1.40m
Additional information	Cloning function UASP and TRIM support Support for FAT32, NTFS, EXT4 and exFAT file systems M Key & B+M Key
OTHER PARAMETERS	
Colour	Grey, black
Material	Aluminium
Dimensions (D/L x W x H)	70 x 125 x 75 mm
Package contents	1 x Docking station 1 x Mains adapter 1 x USB/USB-C cable (0.95m) 1 x User manual 1 x Warranty card
Package depth / length [mm]	80
Package width [mm]	135
Package height [mm]	160
Net weight [kg]	0.372
Gross weight [kg]	0.436
Warranty	24 month
EAN code	5901878526317
