

Qoltec Charger for e-bike, electric scooter 36V | 42V | 2A | 5.5*2.5 | +power cable

Product code: 50761

Charger from Qoltec with a 5.5*2.5 plug for e-bikes with a 36V battery. The stable operating parameters of the charger guarantee the safety of the battery during charging. The charger has protection against overcharging the battery .

ENJOY THE COMFORT OF MOBILE CHARGING

Performance and reliability in everyday use, fast and efficient charging

If you are looking for the right charger to charge your e-bike battery then be sure to check out our range. Qoltec chargers are characterized above all by a **high degree of safety, as well as durability and high performance** . Of course, it is important to remember that care and caution should be taken when charging a lithium-ion battery. Proper charging will have a positive effect on the life of the battery and allow you to maintain the desired performance for a long period of use.

MOBILE AND EASY TO USE

High charging power, advanced electronics, specially designed for charging lithium-ion batteries

The Qoltec mobile charger of 42V and 2A charging current with a 5.5*2.5 plug and an overall charging power of 84W dedicated to 36V lithium-ion batteries, allows you to charge your battery from any 230V electrical outlet. This convenient and functional solution with advanced electronics, protects your battery during the charging process. Equipped with an LED that turns green when the battery is charged.

HOW LONG TO CHARGE THE 36V BATTERY ?

Charge the battery regularly, avoiding letting it run completely flat

The estimated charging time for a 36V battery is on average between 4 and 6 hours . The charging time for an e-bike battery depends not only on the charger's power output, but also on the battery's capacity and its current charge level. Charging will take longer if the battery is completely flat.

If you want to enjoy a long battery life, remember a few rules:

Charge the battery regularly, avoiding letting it run completely flat – ideally after every ride – to keep it at 30–60 per cent.

Avoid charging in extreme conditions, as this will negatively affect the battery's lifespan,

Avoid charging the battery overnight, as this leads to overcharging – fully charged cells wear out more quickly,

We recommend charging the battery to 80–90%, partial charging is better than a full charge, as this prevents overcharging and saves more time.

GUARANTEE OF A SUCCESSFUL AND TROUBLE-FREE RIDE

A compact, portable charger – it fits easily into a rucksack

An electric bike is the ideal tool not only for getting around town quickly, but also your companion during active leisure. With our portable charger, **you can already charge your bike on the road using special charging stations**, for example, and you won't have to worry about suddenly running out of energy to keep moving. Thanks to its relatively compact size, the charger will fit easily into your rucksack.

CONFIDENCE CONFIRMED BY A WARRANTY

This product comes with a 24-month warranty

Do you care about the high quality of the product you are buying? Our solutions will meet your expectations. The chargers we offer come with a

24-month guarantee from the date of purchase.

TECHNICAL DATA

Producer	Qoltec
Type	For E-bikes
Output power	42V / 2A
Input voltage	220 - 240V ~ 1.5A
Output voltage	42V
Frequency	50 - 60 Hz
Plug type	5.5 * 2.5 mm
Maximum charging power	84W
Cable length	~0.9m + 1.10m (power cable)
OTHER PARAMETERS	
Colour	Black
Dimensions (D/L x W x H)	140 x 60 x 35 mm
Package contents	1 x Charger 42V 1 x Power cable 1 x Guarantee card
Package	Box
Package depth / length [mm]	50
Package width [mm]	130
Package height [mm]	243
Net weight [kg]	0,335
Gross weight [kg]	0,385
Certificate	CE
Warranty	24 month
EAN code	5901878507613
