

Qoltec Dust-free paper for fiber optic network 280 pcs. | fibre optics | optics | electronics

Product code: 54266

Dust-free wipes designed for cleaning optical fibres. Durable material with exceptionally low dust generation. The wipes' special structure minimises dust formation and prevents fine fibres from being left on the cleaned components. They can be used with isopropyl alcohol.

TAKE CARE OF THE PERFORMANCE OF YOUR OPTICAL FIBRE NETWORK

Effective cleaning of fibre-optic components

Cleaning optical fibre cables is one of the essential procedures that must be carried out to **maintain a high-quality connection between optical fibre devices and ensure the correct operation of optical fibre cables**. Any contamination, dirt, scratches or cracks **may cause transmission interference**. It is therefore very **important that the fibre surface is always kept clean** . Carefully cleaning optical fibres of dirt, coating residues or vibration-damping gel prior to the splicing process **helps to reduce attenuation losses at the splice**.

A dust-free surface that leaves no fibres behind

The special structure of the wipes minimises dust formation and the leaving of fine fibres on the surfaces being cleaned . This makes the product suitable for tasks requiring a high level of cleanliness and precision.

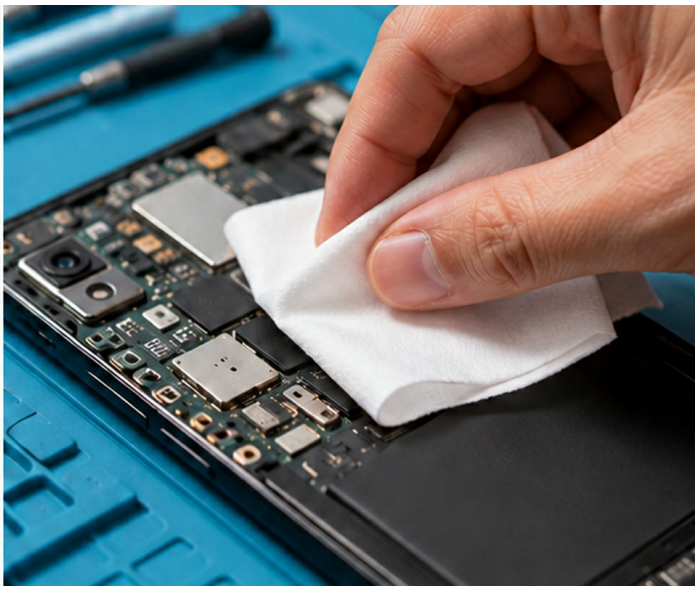

DUST-FREE WIPES - A GUARANTEE FOR PRECISE FIBRE OPTIC CLEANING

Gentle cleaning without the risk of scratches
Qoltec's lint-free wipes are a **guarantee of cleanliness and performance for fibre-optic networks** . They are made from double-sided cleaning cloth which **does not scratch the glass surface being cleaned, is soft and absorbent, does not shed fibres and leaves no dust behind**. They can be used with isopropyl alcohol. The high quality of the product has been repeatedly confirmed by positive recommendations from our customers.
Value pack – 280 pieces
The pack contains 280 wipes, making the product ideal for both one-off installation jobs and regular use in a service centre, workshop or on an assembly line.

CLEAN CONNECTORS ENSURE STABLE SIGNAL TRANSMISSION

For connectors, fibres and installation work
The wipes can be used by network installers, technicians, service engineers and those involved in the construction and maintenance of telecommunications infrastructure.
The product is ideal for:
- cleaning optical fibres,
- preparing fibres prior to splicing,
- cleaning connectors and optical terminations,
- installing and maintaining fibre-optic systems,
- servicing telecommunications equipment,
- cleaning precision optical components.

CONFIDENCE CONFIRMED BY A WARRANTY

This product is covered by a 24-month warranty
Are you looking for a high-quality product? Our range will meet your expectations. The product is covered by a **24-month warranty** valid from the date of purchase.

TECHNICAL DATA

Producer	Qoltec
Quantity	280
Material	Made of a double-sided, anti-stat cleaner that does not draw a cleaned surface
Usage	They are designed to clean the fiber before the welding process.
Additional information	Careful cleaning of fiber optic fibers reduces the damping losses in the weld.
Colour	White
Dimensions of wipes	110 x 210 mm
Package contents	Dust-free wipes, 280 pieces
Package	Box
Package depth / length [mm]	110
Package width [mm]	117
Package height [mm]	75
Net weight [kg]	0.136
Gross weight [kg]	0.140
Warranty	24 months
EAN code	5901878542669
