

Qoltec Electric strike With lock and memory | 12V | Stainless steel

Product code: 52459

Symmetrical electric door strike by qoltec with memory and lock. Powered by 12 VDC direct current. Allows remote control of the mechanism of the access control system. The latch of the electric strike is placed symmetrically in the middle of the housing. It features excellent durability and corrosion resistance.

INNOVATIVE SOLUTIONS FOR ACCESS CONTROL AND SECURITY

Simple operating principle, built-in memory, equipped with lock and latch language adjustment

Electric door openers are an essential component of the access control system, increasingly used in our homes, but also in public institutions and building evacuation. The principle of operation is very simple. In the case of **symmetric electric strikes, giving a pulse makes the electric strike unlocks the entrance lock** , this is the time that allows us to open the door. **Our product is equipped with a number of innovative features that enhance its usability and effectiveness.**:

- Memory - after receiving an electrical impulse until the door is opened, the latch tongue remains released,

- Lock - the electric door strike has a mechanical switch with a choice of CLOSED mode **-** it works like a traditional electromagnetic lock and requires an electrical impulse to release the lock, or OPEN **-** the door is permanently open,

- Latch adjustment - allows the electric door strike to be matched to the door. This is particularly important where weather conditions are particularly unfavourable.

EXCELLENT DURABILITY AND RESISTANCE TO EXTERNAL FACTORS

Manufactured from high quality zinc alloy and stainless steel

The symmetrical electric door strike from Qoltec is not only a product with advanced functionality, but also of **exceptional robustness**. It has been meticulously manufactured from high quality zinc alloys and stainless steel, ensuring outstanding durability and corrosion resistance. This choice of materials is crucial, especially for outdoor applications where the product is exposed to a variety of weather conditions. **The high build quality of the electric door strike also ensures easy and hassle-free installation and maintenance** , further enhancing its appeal to users.

CHOOSE THE RIGHT OPTION FOR YOUR NEEDS

Choose the right option for your needs

The choice between an electric door strike with or without memory should be based on your individual needs and the security requirements of your environment. Our range includes both electric strikes with and without memory and locking function, allowing you to tailor the product to your individual needs and requirements.

CONFIDENCE CONFIRMED BY A WARRANTY

A product with a 24-month guarantee

Do you care about the high quality of the product you buy? Our solutions will meet your expectations. Each of the door openers we offer is covered by a **24-month guarantee** valid from the date of purchase.

TECHNICAL DATA

Producer	Qoltec
Type	Symmetrical with memory and locking
Voltage	12V 10%
AC current	600mA - 10V
Direction	Right
Memory	Yes
Lock	Yes
Mounting plate	No
Distance between holes	55 mm
Latch adjustment	Yes
Signalization	No
Used	Access control system, fire alarm system, time recording, intercoms, video intercoms
Additional information	Dole distance is 55 mm
OTHER PARAMETERS	
Colour	Silver
Material	Zinc alloy / stainless steel
Dimensions (D/L x W x H)	75 x 20 x 31 mm
Package contents	1 x Electric strike 1 x User manual
Package	Box
Package depth / length [mm]	122
Package width [mm]	45
Package height [mm]	35
Net weight [kg]	0.199
Gross weight [kg]	0.215
Warranty	24 month
EAN code	5901878524597
