

Qoltec Smart Wi-Fi Socket 16A | Timer | Energy meter | Tuya | Smart Life | Amazon Alexa | Google assistant

Product code: 52710

A smart Wi-Fi socket that allows you to conveniently control electrical appliances via a mobile app. Thanks to its Wi-Fi connectivity and integration with the Tuya Smart / Smart Life system, it enables you to remotely manage the operation of appliances in your home or office – from anywhere and at any time. The device supports voice control via popular assistants such as Amazon Alexa and Google Home, making it even more convenient to manage your home automation. The scheduling and timer functions allow you to automatically switch connected devices on or off according to a set schedule.

CONVENIENT, REMOTE AND AVAILABLE WHENEVER YOU NEED IT

Smart home control via an app - tailor the operation of your devices to your daily routine

Thanks to integration with the Tuya Smart and Smart Life apps, you can conveniently control your connected devices using your smartphone . Switch devices on and off remotely, set operating schedules and tailor their operation to your daily routine.

This is a modern solution for people who value comfort, saving time and the ability to manage their home devices from a single place.

PLUG IT IN, SET IT UP AND USE IT EVERY DAY

Plug it into a socket, connect it to the app and enjoy convenient control without any complicated setup
The smart plug is easy to install and requires no complicated settings. **Simply plug it into a power socket, pair it with the app and start using it** . Its compact design makes it ideal for use at home, in the office, in a workshop or anywhere else where you need to conveniently control the power supply. **With a maximum current rating of 16 A and a power rating of up to 3680 W, it allows you to connect many popular electrical devices and household appliances** . It is suitable, amongst other things, for controlling lamps, fans, electric heaters, coffee machines, televisions, routers, humidifiers, chargers, office equipment and small workshop tools.

ENERGY AVAILABLE EXACTLY WHEN YOU NEED IT

Save energy and take control – better management of your home's energy consumption
The ability to switch off devices remotely helps to reduce unnecessary energy consumption, particularly when appliances are left on standby. **Schedules and timers allow you to automatically switch connected devices on and off at specific times** . This helps you manage your energy consumption more effectively, enhances convenience and prevents devices from being left on accidentally.
Switch devices on and off without reaching for your phone using Amazon Alexa and Google Assistant
Thanks to compatibility with Amazon Alexa and Google Assistant, you can also switch connected devices on and off using simple voice commands. Once integrated with a compatible voice assistant, you can conveniently control your lighting, fan, coffee machine or other electrical appliances.

TRUST BACKED BY A GUARANTEE

This product comes with a 2-year warranty
Do you want to be sure of the high quality of the product you're buying? **Our solutions will meet your expectations.** This product comes with a 24-month warranty, valid from the date of purchase.
