

Qoltec Electronic timer PC0629 for DIN rail | LCD

Product code: 50629

When used to automate daily operations, a timer can effectively reduce energy consumption by providing the option to control the on and off time of appliances according to a time set by the user.
- Built-in battery
- DIN rail mounting35
- Clear LCD display
- Up to 16 daily or weekly settings

SAVE ON YOUR BILLS - EFFECTIVELY MANAGE YOUR ELECTRICITY CONSUMPTION

Have you ever wondered **how to effectively reduce your electricity bills?** Programming street lighting, for example, is a cost-effective solution for a city that brings real savings by switching the lighting system on and off at precise times.
Saving energy nowadays is not easy, fortunately technology comes to the rescue. **With just one device - an electronic timer from Qoltec -** you can start optimising your energy consumption easily and effectively.
The device has a **built-in rechargeable battery** that is constantly being recharged during operation, which protects the device against the loss of entered settings due to power shortages.

AUTOMATE YOUR HOME - CONTROL THE ON AND OFF TIMES OF YOUR APPLIANCES

A timer is an efficient and convenient device that controls the operating time of e.g. household appliances, such as heating, air-conditioning and lighting, so that **you can enjoy convenience and, moreover, significantly reduce your energy costs** .

With our device, you can already programme the lighting in your garden to greet you when you come home, improve garden sprinkler operation or set the lights in your house to switch off automatically when you leave. It's that simple **- manage your time, make your life easier and save energy.** All you have to do is programme the device to work, set the time it runs, adapting it to your needs.

TIME FOR SMART SOLUTIONS
