Choose reliability and freedom with our universal charger!

MATCHING A POWER SUPPLY – LENDING A HELPING HAND

When choosing a power supply, pay attention to power, voltage, current, and connectors
You can minimize downtime by following a few simple rules outlined in this paragraph.
Remember!
You can read the basic parameters from the **label** on the bottom of the device marked as **INPUT** or from the nameplate of the original power supply described as **OUTPUT**. These will be: **POWER** (W), **VOLTAGE** (V), **CURRENT** (A).
The following points will clear up any doubts that may arise when choosing equipment:
1. **POWER** (W) **–** this number indicates the **minimum value** that the new power supply should have. There is nothing wrong with using a product with **higher power**. This will make it less stressed and therefore less hot.
2. **CURRENT** (A) **–** as with POWER, the value on the new power supply can be **equal to or higher** than that given on the powered device's nameplate.
3. **VOLTAGE** (V) **–** the number for this parameter is more strictly required. Only a **fluctuation of +/- 0.5V** is allowed.

The last and equally important issue is the **PLUG**. Without it, you're going nowhere! There are no deviations here, it is **necessary that it is identical to the original**. The given size indicates the outer diameter and the inner diameter of the pin. If comparing based on the provided photo is not enough, an accurate **measurement** will be necessary to finally **confirm your choice**.

YOUR CHOICE MATTERS

The choice of charger affects device performance, user safety, and battery life
Don't be caught off guard and always be prepared with the Qoltec universal charger. Our solution offers:
- 7 interchangeable plugs that allow compatibility with routers, and tablets from many brands,
- reliability of device operation – ensuring stable and uninterrupted power supply,
- safety – minimizing the risk of tablet overheating or battery damage,
- efficiency – providing the right power for effective device operation,
- battery longevity – ensuring proper charging and discharging cycles that translate to optimal tablet's battery life.

SAFE POWER IN A UNIVERSAL DESIGN

Charger stability thanks to applied protections
Invest in safety – it never loses its value. Made from the highest quality materials, the Qoltec charger is a product worth your attention. It provides the expected **stability** of operation thanks to special protections:
