

Qoltec Industrial Power Socket | CEE 32A | 400V | 5P

Product code: 53179

The CEE 32A 400V 5P surface-mounted industrial power socket is a robust solution for three-phase installations in workshops, garages, industrial premises and EV charging points. Fitted with screw terminals, durable CuZn contacts and an IP44-rated enclosure, it ensures a stable and safe connection in demanding operating conditions.

RELIABLE POWER SUPPLY IN INDUSTRIAL INSTALLATIONS

32A and 400V – a solution for demanding applications

The Qoltec CEE 5P industrial surface-mounted socket has been designed to provide a safe and stable power supply to equipment requiring a three-phase installation. **The socket supports a rated current of 32A and a voltage of 400V AC 50/60 Hz, making it suitable for use with equipment with higher power requirements** . The 5P design allows for the connection of a three-phase installation with a neutral and protective conductor. The protective contact (ground) is located at the bottom of the receptacle, at the 6 o'clock position on a clock face (6h). This is a standard design used in industrial 400V three-phase receptacles, in accordance with the EN IEC 60309-2 standard.

WIDE RANGE OF APPLICATIONS AND EASY INSTALLATION

A robust power supply where reliability matters

The housing, made of durable plastic, and the IP44 protection rating ensure protection against foreign objects larger than 1 mm in diameter and against water splashes . This means the socket can be used in demanding workshop and industrial environments, in accordance with the intended use of the installation.

Surface-mounted installation – convenient fitting

The surface-mounted design allows for quick installation of the socket without the need to drill deep installation holes . The external mounting method facilitates installation on walls, technical structures, and in switchboards and connection points. Screw terminals and cable entry via a cable gland facilitate a stable and durable connection. The socket is ideal for use in workshops, garages and industrial premises, as well as for use as a power supply point for portable EV chargers fitted with a CEE 32A plug.

TRUST BACKED BY A GUARANTEE

This product comes with a 24-month warranty

Do you want to be sure the product you're buying is of high quality? Our solutions will meet your expectations. The sockets we offer come with a **24-month warranty** valid from the date of purchase.

TECHNICAL DATA

Producer	Qoltec
Type	Industrial surface-mounted CEE socket
Number of poles	5P
Rated current	32A
Rated voltage	400V AC, 50/60 Hz
Type of assembly	Surface-mounted
Mounting method	Mounting: external /Cable entry direction: Cable gland /Connection type: Screw terminal
Additional information	Earth contact located at the bottom of the socket (6 o'clock position) IP44
OTHER PARAMETERS	
Colour	Red, white
Material	Plastic, CuZn (contact material)
Dimensions (D/L x W x H)	155 x 72 x 95 mm
Package contents	1 x Industrial surface-mounted socket
Warranty	24 month
EAN code	5901878531793
