Choose reliability and freedom with our universal charger!

MATCHING A POWER SUPPLY – LENDING A HELPING HAND

When choosing a power supply, pay attention to power, voltage, current, and connectors

You can minimize downtime by following a few simple rules outlined in this paragraph.

Remember!

You can read the basic parameters from the **label** on the bottom of the laptop marked as **INPUT** or from the nameplate of the original power supply described as **OUTPUT**. These will be: **POWER (W)**, **VOLTAGE (V)**, **CURRENT (A)**.

The following points will clear up any doubts that may arise when choosing equipment:

1. **POWER (W)** – this number indicates the **minimum value** that the new power supply should have. There is nothing wrong with using a product with **higher power**. This will make it less stressed and therefore less hot.
2. **CURRENT (A)** – as with **POWER**, the value on the new power supply can be **equal to or higher** than that given on the laptop's nameplate.
3. **VOLTAGE (V)** – the number for this parameter is more strictly required. Only a **fluctuation of +/- 0.5V** is allowed.

The last and equally important issue is the **PLUG**. Without it, you're going nowhere! There are no deviations here, it is **necessary that it is identical to the original**. The given size indicates the outer diameter and the inner diameter of the pin. If comparing based on the provided photo is not enough, an accurate **measurement** will be necessary to finally **confirm your choice**.

YOUR CHOICE MATTERS

The choice of charger affects laptop performance, user safety, and battery life

Don't be caught off guard and always be prepared with the Qoltec universal charger. Our solution offers:

- **10 interchangeable plugs** that allow compatibility with laptops from many brands,
- **reliability of laptop operation** – ensuring stable and uninterrupted power supply,
- **safety** – minimizing the risk of laptop overheating or battery damage,
- **efficiency** – providing the right power for effective laptop operation,
- **battery longevity** – ensuring proper charging and discharging cycles that translate to optimal battery life.
